EDUCATIONAL QUALIFICATIONS

Degree	Institute	Year	CGPA
MSc Advanced Computer Science	Queen Mary University of London, United Kingdom	Sept 2025 - Sept 2026	-
B.Tech - Computer Science & Engineering	Lovely Professional University, Punjab, India	Aug 2015 - Jun 2019	9.34/10

LANGUAGES AND TECHNOLOGIES

Machine Learning: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, MLOps (MLflow/Airflow)
Data Engineering & Databases: Apache Spark, SQL (PostgreSQL, MySQL), NoSQL (MongoDB, DynamoDB, Firebase), GraphQL, Hasura, ETL Pipelines
Cloud & Platforms

- **AWS:** EC2, Lambda, S3, RDS, ECS, EKS, ECR, SQS, EventBridge, Step Functions, ALB, IAM, VPC, CloudFront, CloudWatch, ElastiCache, Secrets Manager, API Gateway
- **GCP**: App Engine, Cloud Run, Compute Engine, Kubernetes (GKE)
- **Tools:** Docker, Firebase, Dialogflow, Actions on Google

Programming Languages: Python, C, C++, Haskell, TypeScript, JavaScript (ECMAScript)
Web Development & Frameworks: NestJS, Django, Next.js, ReactJS, Angular, Vue.js, Bootstrap, HTML5, CSS3, Progressive Web Apps (PWA)

WORK EXPERIENCES

Engineering Manager — **Aeria X (formerly UBZ)** — **Apr 2023 - Jan 2025**

- Spearheaded the end-to-end development of a SaaS MVP using **NestJS**, **React**, **React Native**, **PostgreSQL**, **GraphQL** and **MongoDB**, delivering a comprehensive feature set within 6 months with 98% sprint adherence.
- Architected a scalable system handling **10,000+ concurrent requests**, leveraging AWS infrastructure to ensure **99.99% uptime** and long-term platform growth.
- Designed 5+ microservices and multi-database systems, implementing advanced caching to elevate query performance by **60%**.
- Instituted rigorous coding standards and automated workflows, diminishing PR review cycles by 30% and decreasing post-release defects by 50%.
- Following client feedback, led a **complete system redevelopment**, building microservices for **authentication, core functionality, and visitor management**, mitigating **latency by 35%** and increasing **customer satisfaction by 25%**.

Senior Frontend Developer — **EasyEat** — **Mar 2022 - Apr 2023**

- Engineered a centralized synchronization engine for Menu Management and Inventory COGS using advanced State Management patterns, guaranteeing real-time data consistency across **150+ merchants** and boosting a **35% increase in operational efficiency**.
- Pioneered a scalable, **hardware-agnostic printing system** to handle high-frequency transaction logs , providing seamless integration across diverse hardware environments and securing 99.9% reliability during peak traffic.
- Directed the frontend localization and **architectural adaptation** of the Partner App for the Indonesia market , certifying 100% feature parity and optimizing app performance and stability for **50,000+ users**.

Senior Software Developer — **Maximl** — **Nov 2021 - Mar 2022**

- Resolved frontend system logic to enhance interface stability utilizing **Angular** and **Ng-Zorro**, resulting in a **40% reduction in user-reported issues** for a global user base of **20,000+ users**.
- Upgraded complex frontend workflows to verify high-performance rendering and seamless user interactions, reducing UI render latency by **45%** within enterprise-level industrial environments.

Software Development Engineer — **Edfora Infotech Pvt. Ltd.** — **Jul 2019 - Nov 2021**

- Orchestrated the end-to-end development of **myPAT v4** from the ground up, architecting a scalable frontend using **Angular** and **NgRx** to manage complex, multi-step user onboarding and core assessment workflows.
- Implemented a robust, **unidirectional data flow** using **NgRx Store and Effects**, centralizing application state to establish data consistency and predictable UI behavior for over **50,000+ active users**.
- Collaborated with UX teams to revitalize core products (myPAT, Watson, VoD), turning down the **UX issues by 30%** via modular system redesign.

Software Development Intern — **iB Hubs** — **Sept 2018 - Jul 2019**

- Facilitated the development of scalable APIs and automated test suites using **Django**, which fortified system reliability and minimized bug incidents by **25%**.
- Engineered high-performance web applications utilizing **React**, optimizing component architecture and state management to enhance user experience and platform responsiveness from 280ms → **120ms** (**57% improvement**).

COMMUNITY LEADERSHIP & DEVELOPER ADVOCACY

Organizer **Google Developers Group, Jalandhar** **Jun 2017 - Jun 2023**

- Chaired developer ecosystem programs across Punjab and North India, impacting **16,000+ community members** through scaled technical events, and introduced **100+ industry experts**, ensuring **56% women representation** across speaker lineups.
- Managed **300+ tech talks** and **flagship events (DevFest | Cloud Next | I/O Extended)**, strengthening collaboration across GDGs and universities, through sessions on Web Performance, PWAs, Flutter, ML models and open-source tooling.
- Built structured engagement loops bridging speakers → mentees, scaling learning in modern web, mobile, and AI domains, empowering 80% of mentees to secure jobs within 6 months.

WTM Ambassador **Women Techmakers, Jalandhar** **Nov 2017 - Present**

- Drove Women in Tech advocacy across Punjab, achieving **72%+ women participation** in talks, panels, and workshops, expanding community learning to **1,100+** attendees through career-focused sessions on emerging technologies**.**
- Coached a **month-long mentorship cohort for women in tech**, facilitating hands-on learning to 50+ women in **Gen AI, ML Models, Flutter, Cloud, Open Source, and Web/Full-stack development**.
- Mentored **1000+ women**, providing career guidance, technical enablement, and confidence building to break barriers in technology.

AWARDS AND ACHIEVEMENTS

- Presented for **150+ women** at **Google Gurugram** for "Breaking Barriers", by **Women's Web** at **Google Gurugram**.
- Honored as a **Platinum Facilitator** for Google's global initiative; hosted **20+ international workshops** for **800+ participants** to address self-promotion, societal bias, and inclusion from diverse professional backgrounds .
- Awarded with the 100% Facebook-funded **PyTorch Nanodegree Scholarship** for specialized study in Deep Learning.
- Ranked among the **Top 10 teams** in the **Google India Hackathon** (Google Hyderabad) and secured **6th place out of 300+ teams** at the **Rajasthan Hackathon 5.0**, by Rajasthan Govt.
- Recognized as the **"Most Innovative Team"** out of 30+ teams at the **TiE Chandigarh Hackathon** and secured **First Runner-up** among 25 teams at the **SAP Hackathon**.
- **Winner** at **Design Sprint Competition**, DevFest'15, by Women Techmakers & GDG Jalandhar.

ADDITIONAL EXPERIENCES

- Expanded community impact in the **UK** by participating in 15+ tech meetups**,** including volunteering at **DevFest London.**
- Planned and presented at **300+ tech events** across **India**, strengthening regional developer engagement by 80%, representing communities like **Google Developer Groups, Facebook Developer Circles, tech forums**, and **universities**.
- Served as a **Student Mentor** for 40+ students for C programming, fostering peer-to-peer learning environments.

CERTIFICATIONS

- **How Google does Machine Learning** Certification from Coursera.
- Certification of **Learn Flutter - Beginners Course** from Udemy.
